### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Applicant's Remark of July 24, 2006 is acknowledged.

#### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 5 and 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hanazaki et al (US5739741) in view of Himes, Jr. et al (US4845592).

In regards to claim 5, Hanazaki et al discloses a fuse (1) comprising a fuse body (of 1); a housing (10) having a tubular shape with a rectangular cross section, which is made of an insulative resin, and receives and holds the fuse body (of 1) therein, and into which the fuse body (of 1) is inserted through an upper opening (at one end of 10) in the housing (10) so that the fuse (1) is connected to mating terminals accommodated in the housing (10) and; and a cover (9) which is made of an insulative resin, and covers the upper opening (at one end of 10) in the housing (10), wherein the housing (10) comprises a pair of retaining portion (R1, R2) is formed on a pair of opposite side surface of the housing (left marked-up). Hanazaki et al discloses the invention generally as claimed, but lacks a (first) pair of retaining portions. However, Himes, Jr. et al teaches a first pair of retaining portions (A) and a second pair of retaining portions (B) for retaining the cover (22) (right marked-up). It would have been obvious to one having ordinary skill at the time the invention was made to modify the fuse housing of Hanazaki et al by having a first pair of retaining portions as taught by Himes et al by retaining the another portions such as

elements 33 to the housing body. "Corresponding to a retaining claw of a withdrawing jig for withdrawing the housing" is not positively recited in the claim.

In regards to claims 7 and 8, Hanazaki et al discloses the fuse wherein a pair of the retaining portions (R1, R2) (on both sides of 10) are provided on opposite side faces of the housing (10) so that the retaining portions (R1, R2) are aligned in an extending direction of a fusible portion (body of 1)/terminal portions (body of 1) of the fuse body (of 1).

### *Response to Arguments*

4. Applicant's arguments with respect to claims 5 and 7-8 have been considered but are moot in view of the new ground(s) of rejection.

### *Allowable Subject Matter*

Art Unit: 2833

5. Claims 1 and 3-4 are allowed.
6. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
